

Smart Construction Groupware

Release information 08.04.2025

EARTHBRAIN

- Smart Construction Groupware update will be released on the following dates and with the following contents.

Release schedule: JST; Tuesday, April 8th (Planned) 19:00~21:00
(During the release process, the app will be temporarily unavailable.)

No.	Function	Overview	Detail
1	Folders & Files list	[Function improvement] The number of folders and files displayed on one page has been increased → 50 to 100.	As shown on the left.
2	Folders & Files list	[Function improvement] When multiple items were deleted, the snack bar for that item was displayed, but it has been unified into a single snack bar with "XX items completely deleted".	As shown on the left.
3	Folders & Files list	[Function improvement] The folder name when downloading multiple files has been corrected as follows • Jobsite : [Jobsite name]-selected.zip • Folders : [Folder name]-selected.zip	As shown on the left.
4	Copy	[New features added] Added a function to duplicate folder files at the same level.	As shown on the left.
5	Viewer	[New features added] TXT, CSV, and XML files can now be referenced in Groupware.	As shown on the left.
6	Viewer	[Bug fix] In the PDF viewer, the problem of garbled characters when annotating and downloading has been resolved.	As shown on the left.

- Smart Construction Groupware update will be released on the following dates and with the following contents.

Release schedule: JST; Tuesday, April 8th (Planned) 19:00~21:00
(During the release process, the app will be temporarily unavailable.)

No.	Function	Overview	Detail
7	Viewer	[Bug fix] Fixed an issue where the Forge Viewer was not multilingual.	As shown on the left.
8	Calendar	[Function improvement] When you press the "Today" button, both the main calendar and the mini calendar are now displayed in a calendar that includes today.	As shown on the left.
9	General	[Function improvement] The design of the icon has been changed.	Please refer to the explanation on the following page.

- Smart Construction Groupware update will be released on the following dates and with the following contents.

Release schedule: JST; Tuesday, April 8th (Planned) 19:00~21:00
(During the release process, the app will be temporarily unavailable.)

No.	Function	Overview	Detail
10	General	[Function improvement] <ul style="list-style-type: none">Minor UI improvements have been implemented.Improved UI for group invitation modal (when disabled)On the bulletin board, the words "bulletin board name" and "subject" were mixed, so I unified them to "subject".The registration button of the bulletin board (comment) has been changed to a submit button.The save button for creating an appointment has been changed to a create button.The Add User button in the Members tab has been changed to an Add button.The Create Bulletin Board button has been changed to a new button.The Start New Workflow button has been changed to a new button.The appearance of the Float button has been changed.Fixed the UI of the header part of the viewer.Since Get Link and Copy Link are mixed, the link has been unified into Copy.We have added a "" to make it easier to understand the search target.	As shown on the left.
11	System folder	[Function improvement] <p>For the Smart Construction Dashboard system folder, the folder name is now multilingual.</p>	The folder that was previously written as "SC_APP" has been corrected to "Dashboard"

No9
